Karachi, Pakistan • CS student building frontend interfaces and applied ML systems

Education

Bachelor of Science in Computer Science

Sukkur IBA University

Focus: Software Engineering, Frontend/UI, Web Development, AI/ML, Computer Vision

Sep 2022 – Present

Sukkur, Pakistan

Projects

ArbitrageBot – AI-Powered Crypto Trading Automation (Final Year Project)

Mar 2025 – May 2026

Python • React.js • TensorFlow • CCXT • OpenAI APIs • SQLite/MySQL

GitHub Repository

- Built a real-time cross-exchange arbitrage detector with Python, CCXT, TensorFlow, and React.js, achieving sub-second scans and above 85% signal accuracy.
- Implemented GRU price prediction, explainable AI review, and Kelly Criterion sizing, surfacing per-signal confidence scores and scaling position size to predicted win rate.

Osteria Bella – Restaurant Ordering and Admin Platform

React.js • Node.js • Express.js • MongoDB • REST APIs

GitHub Repository

- Developed a restaurant ordering platform across 6 modules using React.js, Node.js, Express.js, and MongoDB: ordering, kitchen status, menu CRUD, reviews, cart, and admin.

Online Question Bank – Android Quiz Application

Kotlin • Jetpack Compose • SQLite • REST APIs • Material Design 3

GitHub Repository

- Built a 5-screen Android quiz app with Kotlin, Jetpack Compose, REST APIs, and SQLite for online practice, offline storage, score tracking, and retained progress.

Experience

Self-Employed Language Teacher

Independent Language Instruction

- Designed personalized lessons, delivered one-to-one instruction, assessed learner progress, and coached public speaking.

Feb 2024 – Present

Karachi, Pakistan

Technical Skills

Programming

Python • C++ • Java • Kotlin • JavaScript/TypeScript • SQL • Bash

Frontend/UI

React.js • Next.js • Tailwind CSS • Redux • HTML/CSS • Jetpack Compose

Backend/API

Node.js • Express.js • FastAPI • Flask • REST APIs • API Integration

AI / ML

TensorFlow • PyTorch • scikit-learn • NLP • LLMs • RAG • Prompt Engineering

Databases

MongoDB • PostgreSQL • MySQL • SQLite

Tools / Workflow

Git • Git Branching Workflows • Docker • Linux • CI/CD • Jest/Cypress • Agile/Scrum

Core Concepts

Data Structures • Algorithms • OOP • Operating Systems • Software Engineering

Certifications

Google AI Essentials Specialization, Coursera

Generative AI, prompt engineering, AI productivity, and responsible AI workflows. Credential

May 2026

Google Prompting Essentials Specialization, Coursera

Prompt design, task decomposition, iterative prompting, and LLM best practices. Credential

May 2026

Leadership & Activities

Project Exhibition Participant

Sukkur IBA University

Presented iCOMET to faculty and evaluators, explaining architecture, AI workflow, technical tradeoffs, and live Q&A.

May 2026

Sukkur, Pakistan

Script Writer, Photography Club

Photography Club

Wrote scripts for promotional videos, event coverage, and social campaigns.

Mar 2025 – May 2026

Sukkur, Pakistan

Creative Leadership & Communication

Completed an original novella, performed stand-up comedy at university events, and competed in story writing competitions.
